

Wild Animal Adventures: Reading Comprehension Quest

English

Grade 3

Animals Theme

Help our animal friends solve their exciting adventures by reading each story carefully and answering the questions!

NAME _____

DATE _____

SCORE _____ / 8

1

Leo the lion is exploring the savanna and finds a map that says: 'Walk past 3 acacia trees, then turn left at the watering hole, and walk past 5 more trees to find the treasure.' How many trees does Leo walk past in total on his adventure?

2

Bella the bear is collecting berries for her family. The story says she picked berries from a bush with 12 berries on Monday and a bush with 8 berries on Tuesday. Her cubs ate 7 berries before bedtime. How many berries does Bella have left?

3

Ollie the otter and his friends are having a race across the river. The story tells us: Ollie swam 15 meters, his sister swam 9 meters, and their friend swam 12 meters. How much farther did Ollie swim than his sister?

4

Zara the zebra found a book in the jungle that describes a herd migration. It says the herd travels 20 kilometers on the first day, 15 kilometers on the second day, and 25 kilometers on the third day. How far does the herd travel in three days total?

5

Tommy the tiger is reading a story about his jungle home. The story mentions there are 18 vines hanging from the big tree, but 7 of them are too weak to swing on safely. How many safe vines can Tommy use for swinging?

6

Penny the penguin discovers an adventure note that says: 'There are 6 ice floes ahead. You can rest on 2 of them, but must hop across 4 quickly.' Then later the note says 'You'll find 5 more ice floes after that.' How many ice floes does Penny encounter in total?

7

Gigi the giraffe is reading a tall tale about acacia trees. The story says one tree is 24 feet tall, another is 19 feet tall, and a third is 31 feet tall. If Gigi can reach up to 18 feet high, how many of these trees are taller than she can reach?

8

Marcus the monkey finds a treasure map showing: 'Start at the coconut tree with 30 coconuts. Collect half of them, then find another tree with 16 coconuts and collect 10 of those.' How many coconuts does Marcus collect in total?
