

Rainforest Reading Adventures: Comprehension Quest with the Jungle Friends

English

Grade 3

Rainforest Theme

📖 Help the rainforest animals solve their reading mysteries by carefully reading each story and finding the answers!

NAME _____

DATE _____

SCORE _____ / 8

1

Sammy the Spider Monkey found a magical scroll hidden in a giant tree. The scroll said: 'In the canopy live 5 bright parrots, 3 sleepy sloths, and 2 playful monkeys. How many animals live in the canopy according to the scroll?'

2

Rosa the Rainforest Rose Frog discovered a journal written by an old jaguar. It read: 'I saw 7 pink river dolphins on Monday, 4 more on Tuesday, and 2 on Wednesday. How many dolphins did the jaguar see in total?'

3

Bella the Blue Butterfly was reading a leaf that told about the rainforest layers. The leaf explained: 'The forest floor has many insects, the understory has climbing vines, and the canopy has the tallest trees.' Which layer has the tallest trees?

4

Carlos the Capybara found a message in a bottle that said: 'There were 12 fruit trees in the forest. The storm knocked down 5 of them. A gardener planted 3 new ones. How many fruit trees are there now?'

5

Petra the Poison Dart Frog read an ancient stone tablet describing rainforest animals. It said: 'Anacondas are long snakes, toucans have colorful beaks, and jaguars are spotted hunters.' What do toucans have that makes them special?

6

Ziggy the Howler Monkey received a map showing his friends' locations. The map read: 'Sloths rest in 8 trees, snakes hide in 6 trees, and birds nest in 9 trees. How many trees have animals hiding or resting in them if some trees have multiple animals?'

7

Lorenzo the Leopard found a legend carved on a rock that explained: 'Three anacondas slithered past the river each morning for 4 mornings. The same three came back each evening. How many anaconda visits happened in total?'

8

Daisy the Tree Frog discovered a rainforest guidebook that stated: 'The Amazon rainforest has more than 390 billion trees, thousands of animal species, and rivers that flow through 9 countries.' In how many countries does the rainforest flow?
