

Robot Adventures: Reading Comprehension Quest

English

Grade 3

Robots Theme

□ Help Rodney and his robot friends solve mysteries by reading each adventure story carefully and answering the questions!

NAME _____

DATE _____

SCORE _____ / 8

1

Rodney just arrived at Robot City and found a note in his pocket. It said: 'Welcome to Robot City! There are 3 friendly robots in the East District, 2 robots in the West District, and 4 robots in the Central Plaza. How many robots should Rodney expect to meet in total?'

2

Bigweld's factory has a library with robot instruction manuals. Monday he received 5 new manuals, Tuesday he received 3 more, and Wednesday he received 2 more. How many manuals did Bigweld receive altogether during those three days?

3

Cappy was organizing a robot party and needed to arrange chairs. She put 2 chairs in the living room, 3 chairs in the kitchen, and 4 chairs in the workshop. How many chairs did Cappy arrange in total?

4

Piper found an old message that read: 'I have 15 oil cans. If I give 6 to Rodney and 4 to Fender, how many oil cans will I have left?' Help Piper solve this mystery message!

5

During a robot scavenger hunt, Rodney collected 8 spare parts on Monday and 7 spare parts on Tuesday. On Wednesday, he found 5 more parts. How many spare parts did Rodney collect in total?

6

Aunt Fan's restaurant serves rusty robots. On the first night, 12 robots came for dinner. On the second night, 8 more robots arrived. How many robots visited the restaurant altogether?

7

Fender was fixing robots in the repair shop. He fixed 6 robots on the morning, 5 robots in the afternoon, and 4 robots in the evening. How many robots did Fender fix that day?

8

Madame Gasket's challenge said: 'To unlock the robot vault, solve this: There are 16 bolts. If you use 7 bolts for Rodney's arm and 5 bolts for his leg, how many bolts will be left?' What is the answer?
