

Arctic Adventures: Addition Quests with Polar Friends

Math

Grade 2

Arctic Theme

Help our Arctic friends complete their icy adventures by solving each addition story problem!

NAME _____

DATE _____

SCORE _____ / 8

1

Pepper the Penguin waddles across the ice and finds 3 fish in one hole. She discovers 4 more fish in another hole nearby. How many fish did Pepper find in total?

2

Biscuit the Polar Bear is collecting snowballs for a game. He packs 5 snowballs in the morning and 6 more snowballs in the afternoon. How many snowballs does Biscuit have altogether?

3

Luna the Arctic Fox is building an igloo and stacks 8 ice blocks on one side. Then she adds 7 more ice blocks on the other side. How many ice blocks did Luna use in total?

4

Shiver the Seal is diving for food and catches 6 tasty seaweed snacks in the morning. In the evening, she catches 5 more. How many seaweed snacks did Shiver catch during the day?

5

Frosty the Snowy Owl spots 4 lemmings near the first glacier and 9 lemmings near the second glacier. How many lemmings did Frosty see in total?

6

Glacier the Walrus invites 7 friends to his ice party. Then 8 more friends arrive unexpectedly. How many friends came to Glacier's party?

7

Snowdrop the Arctic Hare hops to find berries and discovers 9 berries under one snow bank. She finds 6 more berries under another snow bank. How many berries did Snowdrop find?

8

Chilly the Narwhal is swimming with his pod. He starts with 12 narwhals in his group and 8 more narwhals join them. How many narwhals are swimming together now?
