

Forest Friends' Addition Adventures

Math

Grade 2

Nature Theme

Help the woodland creatures solve their exciting addition problems as they explore the forest!

NAME _____

DATE _____

SCORE _____ / 8

1

Squirrel Sam found 3 acorns under the big oak tree. Then he discovered 4 more acorns hidden in the grass. How many acorns did Squirrel Sam find in total?

2

Bunny Belle was hopping through the meadow and spotted 5 red flowers. Further along the path, she found 2 yellow flowers. How many flowers did Bunny Belle see altogether?

3

A robin built her nest with 4 small sticks. Then she gathered 5 more sticks to make it stronger. How many sticks are in the robin's nest now?

4

Beaver Brad swam down the stream and collected 6 pieces of wood. His friend brought 3 more pieces of wood to help build the dam. How many pieces of wood do they have altogether?

5

A butterfly garden had 2 blue butterflies resting on a flower. When the sun came out, 6 more butterflies joined them. How many butterflies are in the garden now?

6

Deer Danielle found 4 mushrooms growing near the forest stream. Her fawn found 5 more mushrooms in a shady spot. How many mushrooms did they find together?

7

A bird's nest contained 3 eggs. Then 4 more eggs appeared. How many eggs are in the nest?

8

Raccoon Ruby searched the forest and discovered 8 berries on one bush and 1 berry on another bush. How many berries did Raccoon Ruby discover in total?
