

Ocean Adventures: Adding with Sea Friends

Math

Grade 2

Ocean Theme

□ Help our ocean friends complete their underwater adventures by solving these addition stories!

NAME _____

DATE _____

SCORE _____ / 8

1

Shelly the sea turtle found 3 shiny shells on the sandy ocean floor. Later, she discovered 4 more shells hiding behind a coral rock. How many shells does Shelly have altogether?

2

Finn the friendly fish was swimming with 5 of his fish friends. Then 6 more fish joined their school to search for food together. How many fish are now swimming as one big group?

3

Ollie the octopus collected 2 smooth pebbles for his ocean garden. His octopus friend Olivia brought 7 colorful pebbles to add to the collection. How many pebbles do they have in total?

4

Splash the dolphin caught 4 tasty fish for lunch, and her baby dolphin caught 5 fish. How many fish did Splash and her baby catch together for their meal?

5

A starfish named Stella had 6 arms full of sea treasures. Her starfish friend brought 3 more treasures to the hiding spot. How many treasures do they have hidden away?

6

Crab Captain found 8 pieces of seaweed for his ocean menu. He found 2 more pieces floating by the rocks. How many pieces of seaweed does Captain Crab have now?

7

Coral the colorful fish was exploring and saw 5 sea anemones. She swam further and discovered 3 more anemones in a new area. How many anemones did Coral find in total?

8

Bubbles the seahorse was collecting pearls and found 6 white pearls. Then she found 4 pink pearls in a secret cave. How many pearls does Bubbles have altogether?
