

Underwater Adventure: Addition Quest with Ocean Friends

Math

Grade 2

Underwater Theme

Help the underwater characters complete their ocean adventures by solving addition problems!

NAME _____

DATE _____

SCORE _____

/ 8

1

Shelly the sea turtle found 3 sparkly shells on the sandy ocean floor. Later, she discovered 4 more shells hidden behind a coral rock. How many shells does Shelly have altogether?

2

Bubbles the dolphin was playing with 2 fish friends. Then 5 more fish came to join the game. How many fish are playing with Bubbles now?

3

Captain Octopus was collecting treasure. He found 6 golden coins in a shipwreck and 2 more coins in a treasure chest. How many coins did Captain Octopus find in total?

4

Splash the starfish saw 4 jellyfish floating by the kelp forest. A few minutes later, 3 more jellyfish drifted into the area. How many jellyfish did Splash see?

5

Finley the fish was swimming past 5 sea anemones when he spotted 4 more colorful anemones waving their tentacles. How many sea anemones did Finley see altogether?

6

Pearl the seahorse collected 2 smooth pebbles from the ocean bottom. Her friend gave her 6 more pebbles as a gift. How many pebbles does Pearl have now?

7

Spike the pufferfish counted 3 passing boats above the water. Then 4 more boats sailed overhead. How many boats did Spike see in total?

8

Marina the mermaid was arranging her collection of pearls. She placed 5 pearls in one coral cave and 3 pearls in another cave. How many pearls did Marina arrange altogether?
