Jungle Explorer's Measurement Adventure

Math Grade 2 Jungle Theme

Help our jungle friends solve their measurement mysteries by using your math skills to complete each adventure!

NAME _____

DATE _____

SCORE _____ / 8

1
Leo the lion is building a den for his family. He needs a vine that is 5 inches long for the entrance, and another vine that is 3 inches long for decoration. How many inches of vine does Leo need in total?

2
Zara the zebra is measuring the tallest tree in the jungle. The tree is 12 feet tall. If Zara stands 2 feet tall, how much taller is the tree than Zara?

3
Percy the parrot is collecting colorful feathers for his nest. He finds a feather that is 6 inches long in the morning and another feather that is 7 inches long in the afternoon. If he lines them up end to end, what is the total length?

4
Ellie the elephant is filling her water hole. The hole needs 20 liters of water to be full. She has already collected 8 liters. How many more liters does Ellie need?

5
Momo the monkey is swinging on vines across the jungle. The first vine takes him 4 meters across the river. The second vine takes him 5 meters further. What is the total distance Momo traveled?

6
Sophie the snake is measuring her body length. Her head is 2 inches long, her middle is 10 inches long, and her tail is 3 inches long. What is Sophie's total length?

7

Bella the butterfly is exploring flowers. One flower is 9 inches tall and another flower is 6 inches tall. How many inches taller is the first flower than the second flower?

8

Rajah the rhino is carrying bananas to share with his friends. He carries 11 bananas in the morning and 7 bananas in the afternoon. How many bananas does Rajah carry in total?

Answer Key

1

Leo the lion is building a den for his family. He needs a vine that is 5 inches long for the entrance, and another vine that is 3 inches long for decoration. How many inches of vine does Leo need in total?

ANSWER

8 inches

2

Zara the zebra is measuring the tallest tree in the jungle. The tree is 12 feet tall. If Zara stands 2 feet tall, how much taller is the tree than Zara?
