

Rainforest Adventures: Measurement Quest with Jungle Friends

Math

Grade 2

Rainforest Theme

Help your rainforest animal friends solve their measurement adventures by using inches, centimeters, and simple math!

NAME _____

DATE _____

SCORE _____ / 8

1

Sammy the sloth is climbing a tree to find the juiciest leaves. He climbs up 3 feet in the morning and 2 feet in the afternoon. How many feet did Sammy climb altogether?

2

Rio the red parrot found a vine that is 8 inches long. She found another vine that is 4 inches long. If she ties them together, how long will the combined vine be?

3

Bella the jaguar is measuring her territory. Her territory is 6 meters wide and 7 meters long. How many meters of the rainforest does Bella have if we add the width and length together?

4

Kavi the toucan wants to build a nest. He collected a stick that is 10 centimeters and another stick that is 5 centimeters. What is the total length of sticks Kavi collected?

5

Zara the boa constrictor was 9 feet long last year. Now she has grown and is 12 feet long. How many feet did Zara grow?

6

Marco the monkey swings from vine to vine. The first vine is 4 meters long, and the second vine is 6 meters long. If Marco swings on both vines, how many meters does he swing?

7

Lily the tree frog hopped 2 inches to the right, then 5 inches to the left on a leaf. What is the total distance in inches that Lily hopped?

8

Rajah the rainforest tiger found a path. The first part of the path is 8 centimeters and the second part is 7 centimeters. How long is Rajah's entire path?
