1

Pablo the Painter wants to buy brushes for his studio. He finds some beautiful brushes that cost 25 cents each. If he buys 3 brushes, how much money will he spend in total?

2

Mona the Mosaic Artist is selling her colorful tile artwork at the gallery gift shop. She sells one piece for 45 cents and another for 30 cents. How much money did Mona earn from these two sales?

3

Vincent the Sculptor has 60 cents to spend at the Art Supply Emporium. He buys clay for 35 cents. How much money does Vincent have left after his purchase?

4

Frida the Fresco Artist is collecting coins to fund her next mural. She finds 15 cents under the paint studio table, receives 20 cents from a friend, and finds another 10 cents in her pocket. How much money has Frida gathered altogether?

5

Leonardo the Landscape Artist is buying paint supplies. Red paint costs 40 cents and blue paint costs 35 cents. If he buys both colors, what is the total cost?

6

Michelangelo the Marble Carver had 80 cents. He spent 50 cents on marble tools. Then he earned 30 cents by teaching an art class. How much money does Michelangelo have now?

7

Bella the Bronze Sculptor is saving to create a new statue. She has 55 cents and wants to have 95 cents total. How much more money does she need to save?

8

Rafael the Rainbow Artist is splitting his earnings with his art buddy. They earned 84 cents together selling their paintings. If they share it equally, how much money does each artist get?
