____ / 8

1

Zeus is collecting golden coins from Mount Olympus to build a new temple. He finds 15 coins in the morning and 12 coins in the afternoon. How many golden coins did Zeus collect in total?

2

Athena the wise goddess is buying supplies for her warriors. She has 50 silver drachmas. After spending 23 drachmas on armor, how much money does Athena have left?

3

Hermes the messenger god earns 8 coins for each delivery he makes. If Hermes completes 5 deliveries across the sky, how many coins will he earn?

4

Three sirens discovered a treasure chest with 9 gold coins each. How many gold coins do all three sirens have when they combine their treasures?

5

Poseidon the sea god has 35 pearls worth money in his underwater palace. He gives 14 pearls to his sea creatures as gifts. How many pearls does Poseidon have remaining?

6

Hades runs an underground marketplace and sells magical stones. On Monday he earned 18 coins, on Tuesday he earned 17 coins, and on Wednesday he earned 15 coins. What is his total earnings for the three days?

7

Medusa needs 32 coins to buy a mystical mirror, but she only has 19 coins saved up. How many more coins does she need to earn?

8

The Minotaur works in the Labyrinth and earns 6 coins per day. If he works for 7 days helping travelers find their way out, how many coins will he earn?
