

Treasure Quest: Ocean Friends' Money Adventure

Math

Grade 2

Ocean Theme

Help our ocean friends count and manage their coins and dollars as they search for treasure and explore the sea!

NAME _____

DATE _____

SCORE _____ / 8

1

Shelly the seahorse found 3 shiny coins on the ocean floor. Her friend Bubbles the fish gave her 2 more coins. How many coins does Shelly have altogether?

2

Captain Crab is buying supplies for his treasure hunt. A treasure map costs 15 cents and a net costs 10 cents. How much money does Captain Crab need to spend?

3

Ollie the octopus has 8 dollars. He wants to buy a diving helmet for 3 dollars. How much money will Ollie have left after his purchase?

4

Three dolphins found a treasure chest with coins inside. The first dolphin found 6 coins, the second found 4 coins, and the third found 5 coins. How many coins did the dolphins find together?

5

Pearl the pearl diver earned 20 cents for finding beautiful pearls on Monday and 30 cents on Tuesday. How much money did Pearl earn over both days?

6

Splash the whale shark saved 12 dollars in his underwater piggy bank. His mom gave him 8 more dollars for helping clean the coral reef. How much money does Splash have now?

7

A school of fish is pooling money for a party. Finny contributed 7 cents, Scales contributed 8 cents, and Shimmer contributed 5 cents. How much did they collect in total?

8

Shelly the starfish bought seaweed snacks for 18 cents. She paid with 25 cents. How much change did the shopkeeper give back to Shelly?
