____ / 8

1

Giraffe Gerald collected 23 acacia leaves for snacking. He wants to know how many tens and ones he has. How many tens does Gerald have, and how many ones are left over?

2

Lion Lucy found 5 tens of golden rocks and 7 ones during her treasure hunt in the desert. How many rocks did Lucy find altogether?

3

Zebra Zeke was arranging his stripes in groups. He made 3 groups of ten stripes and had 4 extra stripes left alone. What number shows how many stripes Zeke has in total?

4

Elephant Emma collected 40 peanuts in the morning and 8 peanuts in the afternoon. She put all her peanuts in tens and ones. How many tens and how many ones did Emma have?

5

Monkey Manny swung through the jungle and found 67 bananas hanging from trees. Can you help him write this number by telling how many tens and how many ones he found?

6

Peacock Petra danced and collected 8 tens of beautiful feathers and 9 ones. How many feathers did Petra gather during her spectacular dance?

7

Crocodile Carl was counting the bubbles in the river. He counted 50 bubbles in the tens place and 2 bubbles in the ones place. What is the total number of bubbles Carl counted?

8

Tiger Tasha caught 6 groups of ten fish and 5 extra fish for her family dinner. After she arranged them this way, how many fish did Tasha catch in total?
