

Garden Friends Discover Place Value Magic

Math

Grade 2

Gardening Theme

□ Help Gigi the Gardener and her friends solve these exciting place value adventures in their magical garden!

NAME _____

DATE _____

SCORE _____ / 8

1

Gigi the Gardener planted flowers in two rows. The first row has 3 tens of tulips, and the second row has 5 ones of daisies. How many flowers did Gigi plant in total?

2

Buzzy the Bee collected pollen from flowers arranged in bundles. He found 2 tens of red flowers and 7 ones of yellow flowers. How many flowers did Buzzy visit altogether?

3

Ruby the Rabbit hopped through the garden counting vegetables. She found 4 tens of carrots hidden in one section and 9 ones of carrots in another. How many carrots did Ruby discover?

4

Sammy the Scarecrow protected the crops by standing in rows. The north field had 5 tens of sunflowers, and the south field had 3 ones of sunflowers. What is the total number of sunflowers Sammy protected?

5

Penny the Panda ate bamboo shoots from the garden store. She munched on 6 tens of shoots on Monday and 4 ones of shoots on Tuesday. How many shoots did Penny eat in those two days?

6

Willow the Wise Owl organized the garden shed. She stacked 7 tens of seed packets on the top shelf and 2 ones of packets on the bottom shelf. How many seed packets are in the shed total?

7

Lily the Ladybug explored the garden beds and found 8 tens of petals scattered by the wind, plus 6 ones of petals by the garden gate. How many petals did Lily count in her adventure?

8

Gus the Garden Gnome built a fence with wooden posts. He placed 9 tens of posts along the east side and 1 one of posts along the west side. How many posts did Gus use for his magnificent garden fence?
