

Animal Adventures: Subtraction in the Savanna

Math

Grade 2

Animals Theme

Help your animal friends solve their subtraction adventures by figuring out how many items they have left after their exciting journeys!

NAME

DATE

SCORE

____ / 8

1

Gigi the giraffe had 12 delicious acacia leaves to munch on during her walk across the savanna. She ate 5 of them by lunchtime. How many leaves does Gigi have left to eat for dinner?

2

Leo the lion had a collection of 15 shiny pebbles from the riverbank. He lost 6 pebbles while chasing a gazelle through the tall grass. How many pebbles does Leo have now?

3

Bella the butterfly started her magical flight with 18 colorful flowers to visit in the meadow. She has already visited and danced around 8 flowers. How many flowers does Bella still need to visit?

4

Oliver the otter found 14 shiny fish in his underwater cave. He shared 6 fish with his otter friends for dinner. How many fish does Oliver have remaining in his cave?

5

Penny the penguin waddled to the ice with 16 fish in her pouch. Her penguin family ate 7 fish during their Arctic picnic. How many fish are left in Penny's pouch?

6

Ziggy the zebra had 13 beautiful striped friends in his herd. Three zebras decided to explore a different watering hole. How many zebras are still in Ziggy's herd?

7

Ellie the elephant gathered 11 bunches of bananas from the jungle trees. She gave away 4 bunches to the monkeys in exchange for mangoes. How many bunches of bananas does Ellie have left?

8

Sammy the squirrel collected 17 acorns for winter storage. He buried 8 acorns in secret hiding spots around the forest. How many acorns does Sammy still have above ground?
