

Mountain Adventure Subtraction Quest

Math

Grade 2

Mountains Theme

Help the mountain climbers solve these exciting subtraction adventures as they explore peaks and valleys!

NAME _____

DATE _____

SCORE _____ / 8

1

Rocky the mountain goat was climbing a tall peak with 12 delicious mountain berries in his backpack. As he climbed higher, he shared 5 berries with his friend Eagle. How many berries does Rocky have left?

2

There were 15 snow-capped peaks visible from Base Camp. When a thick fog rolled in, you could only see 8 peaks anymore. How many peaks disappeared behind the fog?

3

Crystal the snow leopard found 18 icicles hanging from a glacier cave. She knocked down 9 icicles with her tail while stretching. How many icicles are still hanging?

4

A family of mountain climbers packed 14 energy bars for their adventure. They ate 6 bars on the first day of climbing. How many energy bars do they have left for the rest of their journey?

5

Echo the mountain eagle saw 16 fluffy clouds floating around the mountain peaks. The wind blew away 7 clouds. How many clouds are still floating around the mountains?

6

Patches the mountain pika collected 13 pine cones to build a cozy winter nest. He used 4 pine cones to decorate the entrance. How many pine cones does he have left for the nest?

7

At Mountain Lodge, there were 17 visitors warming up by the fireplace. After dinner, 8 visitors went to their cabins to sleep. How many visitors are still by the fireplace?

8

Stone the mountain marmot found 11 tasty roots growing near the rocky trail. A bigger marmot stole 3 roots and scurried away. How many roots does Stone still have?
