

Mythological Adventures: Subtraction Quest with Gods and Heroes

Math

Grade 2

Mythology Theme

Help the ancient gods and heroes solve their magical subtraction problems as they go on epic adventures through Mount Olympus and beyond!

NAME _____

DATE _____

SCORE _____ / 8

1

Zeus had 15 lightning bolts to throw at the Titans, but he used 7 of them in a great battle. How many lightning bolts does Zeus have left?

2

Athena created 12 magical shields for the Greek warriors, but the monsters destroyed 5 of them. How many shields are still safe?

3

Poseidon was swimming with 18 sea creatures in the ocean, but 6 of them swam away to find food. How many sea creatures are still with Poseidon?

4

Hermes had 20 golden coins from trading in the marketplace, but he gave 8 coins to help a poor traveler. How many golden coins does Hermes have now?

5

Aphrodite picked 14 beautiful roses from her enchanted garden to make flower crowns, but 3 roses wilted before she could use them. How many perfect roses can she use?

6

Ares the god of war collected 16 golden shields from past battles, but gave 9 of them to the museum. How many shields does Ares keep for his collection?

7

Hephaestus made 13 magical swords in his forge, but 4 of them needed to be fixed because they had tiny cracks. How many perfect swords are ready to use?

8

Artemis was hunting with 11 magical arrows, but she used 6 of them to catch dinner for the forest animals. How many magical arrows does Artemis have left in her quiver?
