

Underwater Adventures: Subtraction with Sea Friends

Math

Grade 2

Underwater Theme

□ Help our underwater friends solve their exciting adventures by using subtraction to find the answers!

NAME _____

DATE _____

SCORE _____ / 8

1

Shelly the sea turtle was collecting beautiful shells on the ocean floor. She found 12 shells, but 5 of them rolled away into a coral cave. How many shells does Shelly have left?

2

Bubbles the fish was swimming through a school of 15 tiny fish friends. When a big wave came, 6 of his friends scattered away. How many fish friends stayed with Bubbles?

3

Splash the dolphin had 18 sparkly pebbles to decorate his underwater home. He used 8 pebbles for the entrance. How many pebbles does Splash have left to decorate the rest of his home?

4

Coral the sea horse found a treasure chest with 14 glowing pearls inside. He gave 6 pearls to his friend Pearl the starfish. How many pearls does Coral have now?

5

Squirt the octopus was playing tag with 11 friends near the kelp forest. When they heard a whale song, 4 friends swam away to listen. How many friends stayed to play with Squirt?

6

Marina the mermaid was collecting seaweed for dinner. She gathered 16 pieces of seaweed, but 7 pieces floated away. How many pieces of seaweed does Marina have for her meal?

7

Finn the clownfish had 13 colorful anemones in his garden. A strong current moved 5 anemones to a new spot. How many anemones are still in Finn's original garden?

8

Shimmering the angelfish was swimming past 17 sparkling rocks on the ocean bed. She stopped to rest at 9 of them. How many rocks did she pass by without stopping?
