

# Safari Division Adventures: Help the Animal Friends Share Their Treasures!

Math

Grade 3

Animals Theme

Help our animal friends solve their sharing problems by using division to discover how much each animal gets!

NAME \_\_\_\_\_

DATE \_\_\_\_\_

SCORE \_\_\_\_\_ / 8

1

Ellie the elephant found 12 delicious peanuts at the watering hole. She wants to share them equally among herself and 3 giraffe friends. How many peanuts will each animal get?

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

2

Leo the lion caught 20 fish during the great river hunt and decided to divide them equally among his 5 cubs. How many fish does each cub receive?

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

3

Bella the bear discovered 18 delicious berries in a secret forest clearing. If she wants to give the same number to each of her 6 forest friends, how many berries will each friend get?

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

4

Ziggy the zebra organized a great migration and collected 24 bundles of fresh grass for the journey. He needs to divide them equally among 8 zebras in his herd. How many bundles does each zebra get for the trip?

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

5

Penny the penguin and her friends found 15 tasty fish hidden under the ice. If 5 penguins share them equally, how many fish will each penguin enjoy?

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

6

Marco the monkey swung through the jungle and collected 16 bananas from the tallest trees. He wants to divide them equally among 4 monkey friends so everyone gets the same treat. How many bananas does each monkey get?

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

7

Shelly the sea turtle found 28 shiny shells on the beach during her treasure hunt. She decided to split them equally into 7 beautiful piles to decorate different parts of the ocean. How many shells are in each pile?

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

8

Freddy the fox prepared 30 acorns for winter storage and divided them equally among 6 cozy burrows in the forest. How many acorns will be stored in each burrow?
