

Arctic Adventures: Division Expeditions with Polar Friends

Math

Grade 3

Arctic Theme

Help our Arctic friends solve their icy division challenges by dividing resources and treasures they discover on their frozen journeys!

NAME _____

DATE _____

SCORE _____ / 8

1

Benny the polar bear found 12 fish frozen in the ice and wants to share them equally among his 3 friends. How many fish does each friend get?

2

Stella the Arctic fox discovered 20 snowflakes in her crystal collection and arranged them into 5 equal groups for her snow display. How many snowflakes are in each group?

3

During the Great Arctic Seal Race, 24 seals lined up to dive through 6 ice holes equally. How many seals dive through each hole?

4

Ollie the Arctic tern caught 15 tiny ice shrimp and packed them into 3 waterproof bags for his long migration. How many shrimp go in each bag?

5

The Arctic walrus family found 18 clams on the ocean floor and split them equally among 6 family members for dinner. How many clams does each walrus eat?

6

While exploring the Northern Lights, Petra the puffin collected 16 glowing ice crystals and divided them into 4 equal piles to trade with her friends. How many crystals are in each pile?

7

Commander Whale organized an Arctic cleanup where 28 icebergs needed to be divided among 7 whale friends to push them to safe waters. How many icebergs does each whale push?

8

On the frozen tundra, 21 Arctic hares gathered nuts and seeds, then divided them equally into 3 winter storage caves. How many portions of food go into each cave?
