

Dragons of Berk: Division Adventures

Math

Grade 3

Dragons Theme

Help your favorite dragons solve division problems by sharing their treasures, food, and supplies equally across their quests!

NAME _____

DATE _____

SCORE _____ / 8

1

Hiccup found 12 fish in the stream and wants to divide them equally among his 3 dragons: Toothless, Stormfly, and Meatlug. How many fish does each dragon get?

2

Astrid collected 20 dragon saddles from the armory and needs to organize them into 4 equal piles for her training sessions. How many saddles will be in each pile?

3

Snotlout has 18 gold coins from dragon racing winnings and wants to share them equally with his 2 best friends. How many coins does each friend get?

4

The dragon riders discovered 24 dragon eggs hidden in a cave and decided to split them equally among 6 different villages. How many eggs does each village receive?

5

Fishlegs baked 16 dragon-shaped cookies and wants to divide them equally into 2 gift baskets for the dragon sanctuary. How many cookies go in each basket?

6

Toothless found a treasure chest with 15 shiny gems and wants to arrange them into 3 equal rows on his favorite perch. How many gems will be in each row?

7

The Viking village collected 30 barrels of grain to feed 5 hungry dragons through the winter. If they divide it equally, how many barrels does each dragon get?

8

During the Dragon Training Academy finals, Hiccup earned 28 achievement points and his 4 fellow trainees each earned the same amount. How many points did each trainer earn?
