

Garden Friends' Division Adventures: Helping Harvest and Share the Bounty

Math

Grade 3

Gardening Theme

Help the Garden Friends solve their sharing problems by dividing up their garden treasures fairly among their friends!

NAME _____

DATE _____

SCORE _____ / 8

1

Gerty the Garden Gnome harvested 12 beautiful sunflowers from her sunny garden patch. She wants to arrange them equally into 3 bunches to give to her three best friends. How many sunflowers will each friend receive?

2

Petals the Butterfly collected 20 seeds from the wildflower meadow to share with her 4 caterpillar friends. If she divides all the seeds equally, how many seeds does each caterpillar friend get?

3

Digbert the Digging Dog found 15 tasty carrot sticks buried in the vegetable garden. He wants to share them equally among himself and 2 rabbit friends. How many carrot sticks will each animal get?

4

Rosie the Rose planted 18 tiny seedlings in her greenhouse adventure. She decided to organize them into 6 equal rows to make room for them to grow. How many seedlings will be in each row?

5

Splashy the Water Beetle filled 24 cups of fresh water from the garden pond to water different flower beds. If he needs to water 8 flower beds equally, how many cups of water does each flower bed get?

6

Chester the Chipmunk gathered 16 acorns from the edge of the garden forest. He wants to store them equally in 4 different hiding spots for the winter. How many acorns will he hide in each spot?

7

Lady Bug Linda discovered 28 garden pests crawling on the vegetable plants. She invited 7 hungry birds to help her divide up the feast. If they share equally, how many pests does each bird get to eat?

8

Hank the Hedgehog collected 30 dewdrops from the morning garden to help water tiny seedlings. He wants to distribute them equally among 5 special baby plants. How many dewdrops will each seedling receive?
