

# Mountain Adventure Division Quest: Help the Peak Explorers!

Math

Grade 3

Mountains Theme

Help our brave mountain characters solve their division adventures by figuring out how to share supplies, split groups, and organize their expeditions fairly!

NAME \_\_\_\_\_

DATE \_\_\_\_\_

SCORE \_\_\_\_\_ / 8

1

Sierra the mountain goat found 12 climbing ropes scattered across the rocky peaks. She wants to divide them equally among 3 climbing teams. How many ropes does each team get?

---

---

---

2

Alto the eagle is organizing a mountain rescue mission with 20 rescue dogs. He needs to split them into 4 equal groups to search different slopes. How many rescue dogs will be in each group?

---

---

---

3

Peak the wise mountain lion collected 15 pine cones to share with 5 young mountain cubs as winter snacks. If he divides them equally, how many pine cones does each cub receive?

---

---

---

4

Crystal the snow fairy discovered 24 sparkling ice crystals on the frozen mountain lake. She wants to place them equally into 6 magical snow formations. How many crystals should go in each formation?

---

---

---

5

Ridge the mountain climber packed 18 energy bars for his expedition. He has 3 climbing partners including himself. If they share the bars equally, how many bars does each climber get?

---

---

---

6

Summit the trail guide is preparing 21 hiking backpacks for a group adventure. She wants to organize them into 7 equal piles at different trail stations. How many backpacks should be at each station?

---

---

---

7

Avalanche the snow leopard found 16 shiny stones at the mountain base. He wants to divide them equally among 4 different treasure chests hidden across the peaks. How many stones go in each chest?
