

Divine Division: Adventures with Mythology's Greatest Heroes

Math

Grade 3

Mythology Theme

Help the mighty gods and heroes of ancient mythology solve their divine division challenges!

NAME _____

DATE _____

SCORE _____ / 8

1

Zeus has 24 golden thunderbolts that he wants to distribute equally among his 3 sons: Ares, Apollo, and Hermes. How many thunderbolts does each son receive?

2

Athena wove 36 magical tapestries for the 6 temples of Olympus. If she distributed them equally, how many tapestries did each temple receive?

3

Poseidon caught 20 shimmering sea creatures and wants to divide them equally among his 4 water nymphs. How many creatures does each nymph get?

4

Hades collected 32 precious gemstones from the Underworld and decided to share them equally with his 8 underworld guardians. How many gemstones does each guardian receive?

5

Artemis hunted 28 silver arrows and packed them equally into 7 quivers for her huntress warriors. How many arrows go in each quiver?

6

Hermes delivered 18 enchanted messages to 3 different kingdoms equally. How many messages did each kingdom receive?

7

Aphrodite created 45 love potions and bottled them equally into 9 enchanted vials. How many potions are in each vial?

8

Hephaestus forged 35 magical swords and distributed them equally among 5 brave heroes. How many swords does each hero receive?
