

The Garden Gang's Multiplication Adventure

Math

Grade 3

Gardening Theme

Help the Garden Gang solve their multiplication mysteries by figuring out how many plants, seeds, and garden treasures they discover on their amazing adventures!

NAME _____

DATE _____

SCORE _____ / 8

1

Gardener Gerty is planting flowers in her magic garden. She plants 3 rows of sunflowers, and each row has 4 sunflowers. How many sunflowers does Gardener Gerty plant in total?

2

Benny the Bee needs to visit flowers to collect pollen. He visits 5 flower gardens, and in each garden there are 6 beautiful roses. How many roses does Benny the Bee visit altogether?

3

Rosie the Rabbit is gathering vegetables for the forest feast. She finds 4 baskets of carrots, with 7 carrots in each basket. How many carrots does Rosie collect?

4

Professor Petals is organizing a seed treasure hunt. He hides 8 packets of mystery seeds in each of 3 secret garden locations. How many seed packets does Professor Petals hide in total?

5

Daisy the Duck waddles through the vegetable patch and discovers 6 garden beds. In each bed, there are 5 tomato plants growing. How many tomato plants does Daisy find?

6

Digger the Mole is tunneling under the garden and finds 9 spots where bulbs are planted. Each spot has 2 beautiful tulip bulbs. How many tulip bulbs does Digger discover?

7

Sunny the Scarecrow protects 7 sections of the garden. In each section, 8 birds come to visit. How many bird visits does Sunny count across all sections?

8

Splash the Watering Can fills up 4 different gardens with water. Each garden needs 9 full cans of water to stay healthy. How many full cans of water does Splash use in total?
