

Mythical Multiplication Adventures: Help the Gods and Heroes Solve Their Quest!

Math

Grade 3

Mythology Theme

Help the mighty gods, heroes, and magical creatures of ancient mythology solve their multiplication problems as they embark on epic adventures!

NAME _____

DATE _____

SCORE _____ / 8

1

Athena is weaving magical tapestries in her temple. She creates 3 tapestries, and each tapestry has 4 golden threads woven through it. How many golden threads did Athena use in total?

2

Poseidon commands 5 groups of sea creatures to help him guard his underwater palace. Each group has 6 dolphins. How many dolphins is Poseidon commanding altogether?

3

Hermes is delivering messages across Mount Olympus. He makes 7 trips, and each trip he delivers 3 scrolls from the gods. How many scrolls did Hermes deliver in total?

4

Hades is organizing the souls in the Underworld. He arranges them into 4 rows, with 8 souls in each row. How many souls are organized in the Underworld chamber?

5

Aphrodite is preparing love potions for a special celebration. She makes 6 batches of potion, and each batch contains 5 magical roses. How many magical roses does she need in total?

6

Ares is training 8 brave warriors for an important battle. He gives each warrior 2 enchanted swords to practice with. How many enchanted swords does Ares distribute to all the warriors?

7

Demeter is growing crops in her sacred garden. She plants 9 rows of golden wheat, with 3 seeds in each row. How many wheat seeds did Demeter plant altogether?

8

Perseus is showing his friends the reflection on his magical shield. He can see 5 reflections in each of his 4 different positions. How many total reflections can he see?
