

Rainforest Adventures: Multiplication Missions

Math

Grade 3

Rainforest Theme

□ Help our rainforest friends solve their exciting multiplication adventures by finding the correct answers to each story problem!

NAME _____

DATE _____

SCORE _____ / 8

1

Jungle Julia the jaguar is collecting colorful feathers for her nest. She finds 3 piles of feathers, and each pile has 4 feathers. How many feathers does Julia have in total?

2

Basil the blue macaw is organizing a banana feast! He arranges 5 groups of bananas on tree branches, with 6 bananas in each group. How many bananas are ready for the feast?

3

Remy the red-eyed tree frog is hopping across lily pads to escape a rainstorm. He hops to 4 different lily pads, and on each pad he meets 7 other frogs. How many frog friends does Remy meet on his adventure?

4

Stella the sloth is hanging from vines to pick the tastiest leaves. She swings to 6 different trees and finds 3 delicious leaves on each tree. How many leaves has Stella collected for her dinner?

5

Kavi the kapok tree is dropping seeds for the rainforest to grow. Each day for 8 days, the tree releases 5 seeds that float down to the forest floor. How many seeds has Kavi released in total?

6

Penny the pink river dolphin is exploring underwater caves with her pod. She swims through 9 caves and finds 2 glowing crystals in each cave. How many crystals does Penny discover on her underwater expedition?

7

Tango the toucan is decorating his tree home for a rainforest party! He hangs 7 different streamers, and uses 4 bright flowers on each streamer. How many flowers does Tango use to decorate?

8

Ziggy the zebra-striped poison dart frog is leading an expedition through thick vines. His group finds 3 patches of rare plants, and each patch has 8 plants blooming. How many flowering plants does Ziggy's group discover?
