Dragon Adventures: Word Problems from Berk

Math Grade 3 Dragons Theme

🐉 Help Hiccup and his dragon friends solve these exciting word problems by using addition, subtraction, multiplication, and division!

NAME _____

DATE _____

SCORE _____ / 8

1

Toothless, the Night Fury, catches fish for dinner. On Monday he caught 12 fish, on Tuesday he caught 15 fish, and on Wednesday he caught 18 fish. How many fish did Toothless catch altogether?

2

Stormfly, the Deadly Nadder, is guarding her nest of dragon eggs. She has 28 eggs total. If 7 eggs hatch into baby dragons, how many eggs are still waiting to hatch?

3

Hiccup is training baby dragons at the Dragon Academy. He has 4 different training areas, and he puts 6 baby dragons in each area. How many baby dragons is he training in total?

4

Astrid and her dragon Stormfly collect shiny treasures from around Berk. Astrid finds 32 shiny rocks and wants to divide them equally into 4 piles to share with her friends. How many rocks will be in each pile?

5

The village of Berk needs to prepare food for a dragon feast. The cooks make 9 baskets of food with 7 pieces of meat in each basket. How many pieces of meat do they prepare altogether?

6

Fishlegs is studying dragons and records their wing spans. Meatlug's wingspan is 24 feet long. Toothless's wingspan is 35 feet long. How much longer is Toothless's wingspan than Meatlug's?

7

During a dragon race around Berk, Hiccup on Toothless completes 5 laps around the island, and each lap is 8 miles long. How many total miles does Hiccup fly?

8

The dragon stables have 56 dragon saddles that need to be cleaned and polished. If 8 Vikings work together and each cleans the same number of saddles, how many saddles will each Viking clean?

Answer Key
