

Holiday Adventures: Help Santa and Friends Solve Math Mysteries

Math

Grade 3

Holidays Theme

Help Santa, the reindeer, and holiday characters solve exciting math problems during their festive adventures!

NAME _____

DATE _____

SCORE _____ / 8

1

Santa's sleigh is being loaded with presents! He has 15 red wrapped gifts and 12 blue wrapped gifts. How many presents total are going on the sleigh?

2

Rudolph the Red-Nosed Reindeer is leading Santa across 8 houses on Maple Street and then 7 houses on Oak Street. How many houses will Rudolph visit in total?

3

The elves in Santa's workshop made 24 toy soldiers on Monday and 18 toy soldiers on Tuesday. If they donated 11 toy soldiers to the toy drive, how many soldiers are left in the workshop?

4

Frosty the Snowman is having a holiday party and invited 13 snowball friends. Later, 8 more snowball friends arrived as a surprise. How many snowball friends are at the party now?

5

The Christmas tree decorating contest has 3 categories. Mrs. Claus enters 6 decorated trees, and Elf Jinglebell enters 9 decorated trees. How many trees are entered in total?

6

A candy cane factory makes 32 candy canes on the first day of December and 28 candy canes on the second day. How many candy canes did they make in those two days?

7

During the Nutcracker ballet, there are 20 dancers on stage. When 7 more dancers join for the finale, how many dancers are performing together?

8

Gingerbread House Village has 25 gingerbread houses. The baker makes 14 more houses to expand the village. How many gingerbread houses are in the village now?
