

Ocean Adventures: Word Problems with Underwater Friends

Math

Grade 3

Ocean Theme

Help our ocean friends solve their exciting underwater adventures by solving each word problem!

NAME _____

DATE _____

SCORE _____ / 8

1

Splash the Dolphin is collecting shiny shells for her treasure cave. She found 15 shells on Monday and 23 shells on Tuesday. How many shells did Splash find in total during her two-day adventure?

2

Captain Crab is organizing a feast for his underwater kingdom. He has 56 pieces of seaweed and wants to divide them equally among 7 hungry sea turtles. How many pieces of seaweed does each turtle get?

3

Pearl the Sea Star is swimming through a coral reef garden. She swims past 12 colorful fish in the morning and 19 colorful fish in the afternoon. How many fish did Pearl see altogether on her reef adventure?

4

Ollie the Octopus is a paint artist with 8 tentacles. He wants to paint 3 pictures with each tentacle. How many pictures will Ollie paint in total with all of his tentacles?

5

Marina the Mermaid found a treasure chest with 42 golden coins. She found another treasure chest with 18 golden coins. How many golden coins did Marina discover on her treasure hunt?

6

Shelly the Sea Turtle is racing against her friends. She swam 35 meters in the first race and 27 meters in the second race. What is the total distance Shelly swam in both races?

7

Bubbles the Pufferfish is delivering invitations to an underwater party. He has 72 invitations to deliver to 9 different sea creatures. If he gives each creature the same number of invitations, how many invitations does each creature receive?

8

King Neptune's royal garden has 4 sections. Each section has 16 sea plants. How many sea plants are growing in Neptune's entire magical garden?
