

Seasonal Adventures: Long Division with Spring, Summer, Autumn, and Winter

Math

Grade 4

Seasons Theme

Help the Seasons characters solve their magical division problems by working through each adventure step by step!

NAME _____

DATE _____

SCORE _____ / 8

1

Spring is planting 456 flowers in her garden and wants to divide them equally into 3 flower beds. How many flowers will go in each bed?

2

Summer is packing 728 ice cream cones to share equally among 4 summer camps. How many ice cream cones will each camp receive?

3

Autumn is organizing 365 colorful leaves into 5 equal piles for a nature craft project. How many leaves will be in each pile?

4

Winter is distributing 840 snowflakes among 6 decorative snow globes to make them magical. How many snowflakes go in each globe?

5

Spring is arranging 564 raindrops into 4 equal streams for her spring fountains. How many raindrops will flow in each stream?

6

Summer caught 792 fireflies and wants to put them equally into 8 glass jars to light up the night. How many fireflies should go in each jar?

7

Autumn collected 672 acorns and is storing them equally in 7 wooden baskets for the woodland animals. How many acorns will be in each basket?

8

Winter created 936 icicles and wants to hang them equally along 9 rooflines of her ice palace. How many icicles will decorate each roofline?
