

Wild Adventures: Math Word Problems in the Animal Kingdom

Math

Grade 4

Animals Theme

Help your animal friends solve their exciting jungle, forest, and savanna adventures by solving each word problem!

NAME _____

DATE _____

SCORE _____ / 8

1

Leo the lion was organizing a feast in the savanna. He gathered 24 zebra steaks and his friend Gerald the giraffe brought 18 more. How many zebra steaks did they have in total for the big celebration?

2

Bella the bear was preparing for winter hibernation. She collected 56 berries on Monday and 34 berries on Tuesday. How many berries did Bella gather in those two days?

3

A troop of 8 monkeys found a banana tree with 72 bananas. If they shared the bananas equally among themselves, how many bananas would each monkey get?

4

Olivia the otter was organizing a swimming race with her friends. She had 15 fish to give as prizes. If she wanted to give 3 fish to each winner, how many winners could she reward?

5

Roberto the rabbit was building a carrot storage for his family. He started with 45 carrots and ate 12 of them during construction. How many carrots did he have left to store?

6

Petra the penguin and her 6 friends dove down to catch fish. Each penguin caught 7 fish. How many fish did they catch altogether?

7

Sammy the squirrel collected acorns for winter. He found 63 acorns and put them into bags with 9 acorns in each bag. How many bags did he fill?

8

The wolf pack went on a hunting expedition. They caught 28 rabbits on the first night and 19 rabbits on the second night. How many more rabbits did they catch on the first night than the second night?
